Identification
Assessed for eligibility
N=537,997 with at least 2 SCr measurements on different days
Excluded
N=42,383 ineligible (less than 18 years old or left the health board during study)
N=434,004 no AKI episode identified
N=4,704 AKI episode in past 365 days
Inclusion
Study cohort N= 56,906
(at least one AKI episode between 1st January 2010 and 31st December 2018)
Analysis
Full cohort
AKI recovery within 90 days
N=56,906
Recovery cohort
Tested at day 7 and AKI recovery within 90 days
N=29,330
Assessed for de novo CKD
No pre-existing CKD prior to AKI episode
N=14,486
Excluded
N=23,015 no recovery within 90 days
N=4,561 untested at day 7
Excluded
N=14,844 with pre-existing CKD
