

1 **Acknowledgements**

2 ISCN is self-chartered and has become a volunteer-run entity since its original funding by
3 USDA. ISCN would not exist without the generous support, both of time and funding, from
4 various organizations and individuals (see <https://iscn.fluxdata.org/> for detailed contributions).
5 USDA and USGS funding were critical for the development of ISCN. Data infrastructure
6 continues to be supported by Lawrence Berkeley National Laboratory. A subset of the
7 workshops and synthesis efforts mentioned in this report were funded by Bonanza Creek LTER,
8 Stanford University's Cox Fellowship and The Bolin Centre for Climate Research at Stockholm
9 University. G. Hugelius acknowledges the Swedish Research Council (2014-06417 and 2018-
10 04516). J. Holmquist and the Coastal Carbon Research Coordination Network are funded by
11 NSF Grant [DEB 1655622]. ISRaD and A. Hoyt are funded by the European Research Council
12 (ERC) under the EU Horizon 2020 programme [grant agreement No. 695101 (14Constraint)].
13 The experimental and long-term data synthesis is being conducted as a part of the LTER-CZO-
14 NEON soil organic matter research Synthesis Group funded by the National Science Foundation
15 under grant DEB#1545288, through the Long Term Ecological Research Network
16 Communications Office (LNCO), National Center for Ecological Analysis and Synthesis
17 (NCEAS), University of California-Santa Barbara. Funding for the root trait and soil carbon
18 workshop came from the Climate Change Science Institute at Oak Ridge National Laboratory.
19 C.M. Iversen and the Fine-Root Ecology Database are supported by the Department of Energy's
20 Office of Science, Biological and Environmental Research Program. Mechanisms of soil carbon
21 storage and stability working group was supported by the "What Lies Below? Improving
22 quantification and prediction of soil carbon storage, stability and susceptibility to disturbance"
23 by the John Wesley Powell Center for Analysis and Synthesis, funded by the U.S. Geological
24 Survey.
