Request for Quote: Ethernet circuit - Fort William to Edinburgh

Open

HUBS is engaging with communities on the West Coast of Scotland and helping to design a high-speed licensed wireless backbone along the coast from Mull to Applecross. We need to connect this backbone to our existing facilities in Edinburgh and so require an Ethernet circuit.

This project is currently in the planning stages and is likely that construction will begin this summer, requiring this circuit in Fort William in August or September.

Circuit Characteristics

- 100Mbps Committed Information Rate
- Gigabit Ethernet bearer
- Must transparently pass 802.1q VLAN tags and MPLS

Please specify installation costs and monthly/yearly rental as well as any charges for increasing or decreasing the CIR in increments up to 1Gbps.

A end

Blar Mhor Industrial Estate
Fort William
Inverness-Shire
