KEYWORDS

cerebrovascular reactivity, magnetic resonance imaging, blood oxygen-level dependent, arterial spin labelling MRI, hypercapnia (CO₂) inhalation, systematic review

A Corrigendum on

Cerebrovascular reactivity measurement using magnetic resonance imaging: A systematic review

by Sleight E, Stringer MS, Marshall I, Wardlaw JM and Thrippleton MJ (2021). *Front. Physiol.* 12: 643468. doi: 10.3389/fphys.2021.643468

In the published article, there was an error in [Figure 5](#) as published: the wrong [Figure 5A](#) was inserted. The corrected [Figure 5](#) and its caption appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's note

All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated organizations, or those of the publisher, the editors and the reviewers. **FIGURE 5**

Distribution of the **(A)** CVR processing and **(B)** delay computation methods with the associated year of publication of the paper. The category "Others" in **(B)** includes deconvolution to find the HRF between the EtCO₂ and the MRI signal, and GLM with two ("fast" and "slow") regressors. STD, standard deviation of MRI signal; HRF, haemodynamic response function; GLM, general linear model.
