

Figure S7.

RT-qPCR determination of relative expression levels of (a) *PttCNA*, (b) *PttCRE1* and (c) *PttHK3a* at ZT1 and ZT19 in RNA extracted from internode 15 of WT and *hy-10* trees grown under long days 18:6 L:D. Values are means \pm 1SE (n = 3–4). Levels of gene expression were standardized using the reference gene EF1 α .
